CENTRAL INVESTIGENCE AGENCY

50X1-HUN

	CENTIFICAL THE EMPLEMENTAL VIEW OF	DUX1-HUIVI
	sounds of much activity in the area south of the power plant and west of the Tuntsa River suggested dump trucks being emptied and explosives being detonated. smoke and phosphorous lights burning, each for three or four seconds in fixed positions; they were not aerial flares. Other signs of work were also audible in the area. At 0500 hours men in cars were heard leaving the village, crossing the bridge and proceeding, apparently, in the general direction of the area of activity described above.	50X1-HUM
6.	a road on the western side of the railroad roughly lake west of the Tuntsa River. The road is seven meters wide, with a well-travelled, gravel surface. The road intersects the railroad and the two roads discussed in paragraphs two and three, and runs in a NNW direction. There are no telephone lines along this road.	50X1-HUM 50X1-HUM
7.	At approximately 67-04N, 29-59E a road which was built during the war. The road runs in a north-south direction, is four meters wide, has a gravel and dirt surface, and is covered with grass. The road is unused and old half-track marks were in evidence.	
8.	An unfinished railway station, lacking chimney and windows, is located at approximately 67-02-50N, 30-05E. The railway in front of the station is double tracked for approximately 300 meters. No cars were observed on the siding. An unfinished railway station of the station is double tracked for approximately 300 meters. No cars were observed on the siding. An unfinished railway station above. The station is described in approximately 300 meters. No cars were observed on the railway station at approximately 67-01-40N, 30-03E, on the opposite, or west, side of the railroad described in paragraph three, from the station above. This station was six by seven meters, with a chimney but no windows. Both stations were evidently in use, as the paths leading to them showed signs of use.	50X1-HUM
8*	At approximately 67-04N, 29-35E an unused military road which runs in a north-south direction this road was built during the war and appeared to be unused as trees were down across the road, blocking it. The road was five meters wide, had a gravel surface, and was in good condition.	50X1-HUM
10,	The Salla-Liinahatunkangas road is four meters wide, has a gravel surface, is much used and in good condition. Four telephone lines run along the eastern side of the road.	
11.	There is a dirt road located at 63-07N, 31-41E which runs in a north-south direction. This road is 3.5 meters wide and is in a very bad condition. No road traffic was observed; however, there were old traces of truck traffic and more recent traces of horse-drawn wagons.	
12.	Continuous heavy motor traffic was observed on a road running in a north-south direction through Prjakkila (63-07-20N, 33-11-15E), east of the Jangoserk River. Numerous men and women were felling trees in the vicinity.	
	Military Information	50X1-HUM
13,	four and on the western side of the Tuntsa River a new defense line. Trees and brush have been cleared for some distance in front of the defense line; pillboxes for machine guns have been made of stone or dug and blasted into stone, and stones	50X1-HUM
	have been piled up in front of the loopholes. this may be a defense installation for the Tuntsa River, power station, etc., or the line may be part of a defense line running south toward the area of activity described in paragraph five.	50X1-HUM
14.	an airfield across the Tuntsa River just NW of the village. was small, about 600 to 700 meters square. Three hangars could be seen, but no aircraft were observed.	50X1-HUM

15. There is a billeting area in the vicinity of 66-59-30N, 29-33-30E.

Another billeting area is

SOX1-HUM
located in the vicinity of 66-5%-40N, 29-14E. There are at least three new houses and one large barn, where, judging from the noise, dogs are kept.

16. Soviet Border Guard outpost billets consisting of three new houses and two barns, all of normal size, are located at approximately 67-04-308, 29-24E.

50X1-HUM

17. A Soviet border post is located at approximately 63-07N, 31-26E.

18. A Soviet company headquarters is located at approximately 63-05N, 31-34E, consisting of three barracks, three sheds, an observation tower, and a bath house.

Rivers

- 19. The Nurmi (Nurmijoki) River is seven meters wide, has a hard gravel and sand bottom, and can be crossed by wailing.
- 20. The Jukkuu (Jukkuujiki) River is a shallow stream with a hard bottom which can be crossed by widing.
- 21. The Kulo (Kuola) River can be crossed by crawling over log booms in the area of 67-01N, 2/-28E.
- 22. There are many trooks and small streams not indicated on maps between Lavaselts on the Nurmi River and the Jukkuu River.
